

## Technical Data Sheet

**Chemical Name:** Dichlorometaxlenol  
**Synonyms:** 2,4-dichloro-3,5-dimethylphenol  
**Molecular Formula:**  $C_8H_8Cl_2O$   
**Molecular Weight:** 191.06  
**CAS Number:** 133-53-9  
**EINECS Number:**

**Properties:** It is white needle crystal with a characteristic odor, its melting point is between 91 to 96°C. It very slightly soluble in water even at high temperatures and a great extent in alcohols such as ethanol, isopropanol, glycols and glycol ethers.

**Quality Standards:** Q/OKZY014-2005

<u>Test Items</u>	<u>Specifications</u>
Appearance and color	Gray to white flakes or crystalline powder
Melting point	91~96°C
Content	≥99%
Acid (PH)	5.0~6.0

**Package:** In 25kg cardboard drums.

**Usage:** It is a high efficient antimicrobial agent with wide spectrum, and it is broadly used in daily used or specialized disinfectant.
